ADHD prescription refill instructions:

In the spring of 2021, we will be changing our ADHD medication refill process for the clinic. The primary way to refill ADHD medications will be via our patient portal.

Please follow these office procedures when using this service:

1. If there is a problem with your child's current dosage, please arrange to speak with your primary doctor by sending a message via the portal or calling our office.
2. If you are not signed up for the patient portal, go to our website- southdalepeds.com, click on "I want to" near the top, select "sign up for the portal", and follow the instructions.
3. In the portal, click on the tab near the top that says "ADHD medication refill". Then select the blue hyperlink "click here to go to messages". Then select "send a message", select appropriate patient name, send to "ADHD refill" option.
4. In the message section of the portal message, include the information in the back of this sheet. You must provide all of the information that is required to process your request. It is suggested you copy and paste this information when sending a refill request message via our portal.
5. This service is for **ADHD** prescription refills, and cannot be used to refill other prescriptions or talk to a nurse about any other topics not directly related to refilling your child's **ADHD** prescription.

Thank you for using Southdale Pediatric Associates, Ltd.,
ADHD prescription refill service.
